

RoyalFood Theme Documentation

Thank you for purchasing theme from Codezeel.

1. Installation

The installation of a theme is a relatively straightforward process and here we will guide you through the steps of the process for theme installation.

Before you install this theme:

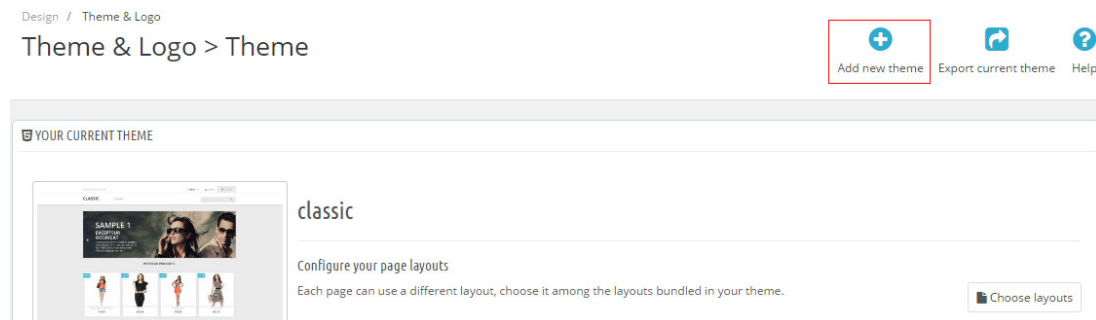

- 1: Read our complete instruction to install theme
- 2: Make sure you have installed and running the correct version of Prestashop: **Prestashop 1.7.x.x**
- 3: Take a FULL BACKUP for your site before you start theme installation if you have done any custom core modifications.

We recommend to use this theme on a new, clean installation or existing shops without custom core modifications.

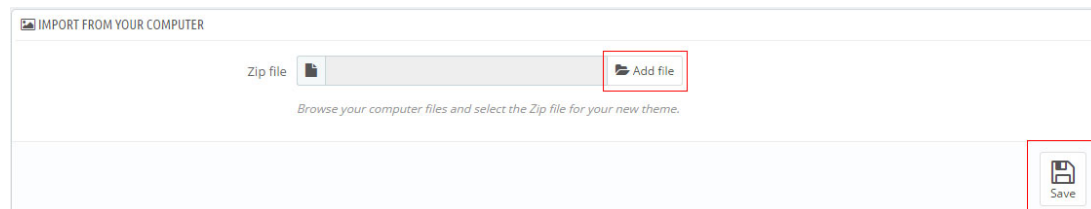

Theme installation steps:

First of all login to your prestashop store admin panel and navigate to **Design > Theme & Logo**.

Here in this section top right corner you will see **"Add new theme"** button. Click here.

Here you will see **"Import from your computer"** you need to select Installer ZIP file which you have with theme downloaded package (**PRS010006_Installer.zip**) and click on **"Save"** button.

You have successfully installed your new theme!

NOTE:

After completion of above process upload all static images on your server in `"/public_html/img/cms/"` directory using FTP or Cpanel Like Below Image.

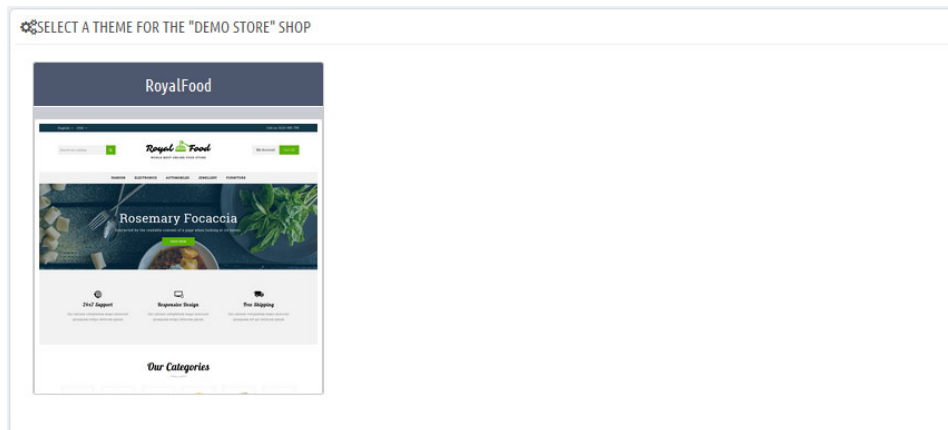

You can find images in package folder: `Prestashop Files_v.1.7.x.x/img/cms/` directory.

11) CZ - Footer CMS Block

 **CZ - Footer CMS Block**
v1.0.0 - by Codezeel Adds custom information block in your store.

Now, Click on **"Configure"** link.

The screenshot shows the top section of a CMS editor. At the top left, the text 'CMS BLOCK' is displayed. Below it is a toolbar for a 'Text block'. The toolbar contains various icons for text formatting: bold (B), italic (I), underline (U), strikethrough (ABC), bulleted list, numbered list, indent, outdent, link, unlink, table, image, and video. A red box highlights the 'Source code' icon (two arrows pointing in opposite directions). A tooltip with the text 'Source code' is visible next to this icon. Below the toolbar, the text 'CZ - CMS Text Block' is displayed. At the bottom left, there is a 'Back to list' button with a circular arrow icon. At the bottom right, there is a 'Save' button with a floppy disk icon, which is highlighted with a red box.

Click on **Source code** button display in screen shot and paste below **HTML code** for **CZ - Footer CMS Block** and click on **"OK"** button.

After that Click on **"Save"** button.

HTML code for CZ - Footer CMS Block

```
<div class="footerdiv">
<div class="footerlogo"></div>
<div class="footerdesc">At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum.</div>
</div>
```

12) CZ - Payment logos Block

CZ - Payment logos block
v1.0.0 - by Codezeel

Adds a block which displays all of your payment logos.

CONFIGURE  

Now, Click on **"Configure"** link and select "Destination page for the block's link" then click on **"Save"** button.

13) CZ - Instagram Block

CZ - Instagram Block
v1.0.0 - by Codezeel

Display Instagram pics from an account

CONFIGURE  

Now, Click on **"Configure"** link to change configuration settings.

In this configuration settings you need your instagram account access token and user id to display your instagram account images on your store. Here is link to get your account access token of your instagram account. <http://instagram.pixelunion.net>

14) Product Comment Module

Go to **Modules and Services > Modules and Services** click on **Upload a module** at Top right corner. Upload Product Comment module **"productcomments.zip"** from theme package.

Product Comments
v9.2.0 - by modified by
MyPresta.eu

Allows users to post reviews and rate products on specific criteria.

CONFIGURE  

Basic configuration

You can turn on feature to validate the reviews before they will be visible on product pages

You can disable or enable possibility to add review about product for guests (simple page visitors - not customers)

You can define the time that is required to pass to post second review

Reviews Criteria

Module allows to add comments about products. In addition - you can define reviews criterions. You can add as much criterions as you want and associate these criterions with specific products or products from categories. Thanks to this your products can receive various grades.

Reviews waiting for approval

As you already know with this module you can enable feature to validate the review before it will be visible. On product edit page you can find section where you will see the reviews that waiting for validation. You can approve review, or remove it.

Reported reviews

Shop visitors / guests or customers can report reviews. You will be able to preview the reports on module configuration page and

remove the report (deny report) or accept the report - module will hide the comment then.

4. Image Settings

Our live demo store uses the following image sizes for products.

So it's suggested to edit a product image size parameter named.

Go to **PREFERENCES > Images** and update image size for your store.

See below screen shot.

In our live demo store we have uploaded product image size dimension is **1000 x 1000 (W x H)** to display image with exact cropping.

IMAGE SETTINGS 7
